Sodium-filled valves controlled by hydraulic lifters finish off the rather high-tech specs. Instead of a timing belt, a double row timing chain was used. Output was rated at 134 horsepower and 127 lb.-ft. of torque. Six years later, BMW introduced an upgraded, 1.9-liter version of this engine called the M44. Significant differences included the bump in displacement, a move to roller rockers, and a redesigned head that did away with the cam carriers—the cams now rode right in the head.
