A line plot is a graph that displays data using a number line. To create a line plot, first create a number line that includes all the values in the data set. Next, place an X (or dot) above each data value on the number line. If a value occurs more than once in a data set, place an Xs over that number for each time it occurs.

Frequency Table. A frequency table is a common way to organize large amounts of data. A frequency table shows the number of times each item appears. It has a scale that includes all of the numbers in the data and an interval, which separates the scale into equal parts. A frequency table has 3 columns: interval, tally, and frequency.
