It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.

Zephyr Builds Guide. One of the more overlooked Warframes - and one that could definitively could need some buffs or a whole rework - is the light-footed Zephyr. She does have a unique skill set that got slightly more relevant with the open world maps, but is usually considered not very strong. The main problem is simply her damage scaling and the fact that all her abilities are not really in a great place for the current meta.

Zephyr's name is derived from Zephyrus, one of the four most important Anemoi in Greek legend. Zephyrus holds domain over the west wind and flowers, and he also serves as a messenger for Aphrodite and Eros. Zephyr was confirmed to be originated as a fan-made concept in Devstream 22 by user Volkovyi.
